Advantages

- Faster installation
- Better technical support

El Dorado Airport in Bogotá

This is how ACO helps to connect
35 million people each year.

As the El Dorado Airport is the main hub for passengers as well as cargo in Columbia, the General Directorate of Civil Aeronautics initiated the expansion. This was the starting point of the most ambitious modernization and expansion project for the El Dorado Airport.

El Dorado is the third most important airport in Latin America in passenger transport.

In 2019 it served over 35 million passengers and in 2018 more than 340000 tons of cargo. The expansion program also included 6 passenger bridges to increase the arrival and departure capacity, allowing greater comfort and efficiency at the most important air terminal in the country. Therefore, this project was of utmost importance and demanded reliable solutions.
